-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. A reference to the prior application must be inserted as the first sentence of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e) or 120. See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. The applicants should amend the first paragraph of the application to show the status of the prior US application.

### ***Specification***

2. The disclosure is objected to because of the following informalities: The word “pyrrolidon” is not spelled using the US convention, which has an “e” at the end.

Appropriate correction is required.

### ***Claim Objections***

3. Claims 2 and 14 are objected to because of the following informalities: The word “pyrrolidon” is misspelled. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1773

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Process limitations in claims are not limited to the manipulations of the recited steps, only the structure implied by the steps. " In re Thorpe , 227 USPQ 964, 966 (Fed. Cir. 1985). Thus, the examiner takes the position that applicants have merely claimed an article having a surface polymerized coating. In order to overcome the below rejection, it is the applicants' burden to show that the process limitations in the claims would produce a materially different object than those taught by the prior art.

5. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Stewart et al. (6,053,171).

6. Stewart et al. teach polymeric tubing coated with a layer of polyvinyl pyrrolidone formed by plasma treatment.

7. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Woods et al. (4,675,273).

8. Woods et al. teach silicon substrates having a polymerized ethylcyanoacrylate coating (Example 1).
